

SUSTAINABLE LAPTOPS IN EDUCATION

Giving the next generation
reliable and sustainable IT

Because IT shouldn't cost the Earth

If you could buy laptops for up to 40% less than the cost of new, with 97% of the performance and a full 3-year warranty, why wouldn't you?

Our mission is to change the way the world buys IT.

Having worked with hundreds of schools and colleges across the UK and Europe, we are confident that we can save you thousands of pounds on laptop procurement. At the same time, you get real sustainability benefits to shout about to your students, parents and local community.

Unfortunately, large corporations rarely keep laptops after the 3-year lease or warranty period - and yet the technology is thin enough, light enough and powerful enough to last far longer.

The increasing demand for technology places an ever greater burden on the

environment, often resulting in the destruction of habitats and landscapes around the world.

The result is excessive resource consumption, climate change, conflict mining, human rights issues, pollution and e-waste.

There is a better way.

We remanufacture enterprise-grade, leading-brand laptops to give them a new lease of life at a fraction of the cost of buying new. It makes your ever-shrinking budgets go further and saves the planet at the same time.

Remanufactured quality

Not to be confused or compared with second-hand or refurbished laptops, Circular Computing™ laptops change the 'new vs old' equation with a new class of product: remanufactured.

At our world-class, state-of-the-art production facility, fully-qualified technicians remanufacture leading brand laptops to ISO8887 quality standards.

Through our unique extensive 5+ hour remanufacturing process, and 360-point quality check, we deliver unrivalled quality and consistency you can rely on.

The most sustainable and ethically produced laptops in the world.

- Comprehensive cosmetic detailing ensures every laptop is of unrivalled finished quality
- Complete peace of mind with a 3-year next day replacement warranty
- A/C wireless fitted as standard for maximum performance connection speed
- Inspection, testing and component repair or replacement means that we can guarantee consistent quality of the same specification laptops in large volumes
- Configured to order with Microsoft Windows 7 or Microsoft Windows 10 Professional to suit your network

Making a real difference

Through our investment in clean energy projects across the world, our laptops are carbon-neutral products. Also, we compensate for legacy carbon emissions by planting 5 trees for every laptop sold. We have planted over 100,000 trees worldwide.

Through reforestation projects with WeForest and One Tree Planted, we are transforming global landscapes to help combat climate change and preserve the planet.

We plant five trees for every laptop we sell.

Carbon
Neutral
Product

Our partnership with WeForest is about people too - reforestation projects create businesses that generate sustainable employment in vulnerable communities.

By purchasing carbon-neutral remanufactured laptops from Circular Computing™, you will be making a direct and positive impact on the environment, the lives of others and the planet.

Download your free sustainability teaching module

Our commitment to sustainability begins at school. Working with local educational organisations, we have created a FREE Key Stage 2 Sustainability Teaching Module with lesson plan and resources.

Need to purchase on a framework?

Available from your reseller and through most education frameworks; CPC, KCS, CCS, Everything ICT and more...

Our availability on Education Frameworks enables schools, multi-academy trusts and local authorities to purchase technology directly to save time and money on procurement. There is no longer a need for three quotations to be gathered which makes it easy for schools to purchase our remanufactured carbon-neutral laptops.

Case study: Chichester High School

Jim Turner, the Network Manager at Chichester High School (CHS), is an experienced IT Manager that wants the best for his school, the environment and the childrens' education.

His challenge was to replace over 100 of his existing laptops with enterprise-grade (Intel Core i5/SSD) models from a reputable brand at the same time as avoiding cheap, low-performance models and unknown brands. And to do all of this within a very tight budget.

An Education Reseller got in touch and really took the time to get to know Jim and Chichester High School. As an authorised reseller of Circular Computing™ laptops that specialise in supporting IT in schools and colleges, they really understood the needs and challenges within the education market.

Further consultations to understand CHS as a customer and the solution became clear. As part of the package, the Education Reseller supplied 114 remanufactured Circular Computing™ laptops.

“Good high quality, high spec and reliable machines that look just like new. The Circular Computing™ machines represented the best value for my budget.”

Jim says “it felt as if it was 10 years ago when finances were more readily available. The laptops all look and perform as a new laptop and the 3-year warranty reassured me that support was there if I needed it – it creates peace of mind. So much so that I recommended it up to the rest of the TKAT Multi Academy Trust.”

136 tonnes of e-waste avoided through using remanufactured

68 tonnes of CO₂ sequestered from the atmosphere

36 tonnes of CO₂ prevented by avoiding manufacture of new

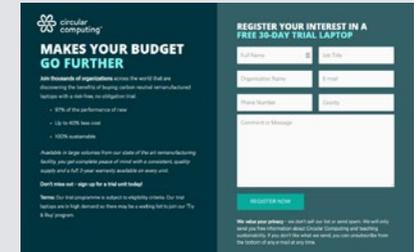

570 trees planted through reforestation partnerships

Free 30 day trial laptop

The quality of our laptops is so good, people have difficulty believing that they are remanufactured second-user units. The only way to find out for yourself is to take a closer look with a no-risk, no-obligation trial unit.

All we ask is that you show your colleagues and let us know what you think. If you are not impressed, just put it back in the box and send it back - we'll even pay the return postage.

Of course, we think that you will want to keep it and order a whole batch because you love it as much as we do!
